

I-Deal Mobile

Place your orders – standing right at your shelves!

I-Deal Mobile from VFM is the perfect solution if you want to place your daily orders quickly and easily when you're on site at your store. You can now place orders in the same way with all your suppliers, and even with smaller direct suppliers, using a user-friendly PDA or mobile phone. And you'll never have to miss another important message, either.

Store Manager – created especially for you

There are two flavours of I-Deal Mobile available for the food and retail trade: Store Manager for stores and Field Sales for field sales staff. With Store Manager, all you have to do is walk round your store carrying a simple to use PDA and then enter orders as you work out what additional stocks are required. The technology behind I-Deal Mobile is so cost-effective and smart that this solution is available now even to smaller direct suppliers – who up to now never had the option of managing online orders.

Saves information, issues reminders

I-Deal Mobile means you can always see your latest orders – a crucial function if several people at your store place orders. This system also reminds you which suppliers you should be ordering from on a particular day. If you also use I-Deal Mobile to record goods inwards, this will give you complete data which you can then compare with your supplier's invoice, saving you time and money.

Important messages from your supplier or chain

You're always on the go in your job, so it can be tricky for your supplier or chain to find you when they have important messages for you. With I-Deal Mobile, they can send information directly to your PDA or mobile phone, so you'll receive immediate notification of food alerts, delivery issues or alterations to procedures.

No Internet required

You won't need an Internet connection to place your orders. I-Deal Mobile maintains contact with your suppliers' systems by GPRS, a painless and extremely reliable solution. And of course, this system can also be used over a WLAN.

Enter orders, send them later

You can use I-Deal Mobile offline as well, if you like. This will allow you – for example – to ask store staff to enter all the orders, which can then be handed over to your purchasing manager. He or she can then review the day's orders and send them out. Your PDA will save all the information you need in your day to day order routines – order history, statistics, pricing and product lists. ►

PDA or mobile phone

At VFM, we're partners with some great suppliers of lightweight, ergonomic PDAs which work perfectly with the I-Deal Mobile technology. We'd be happy to help put you in touch with the right company. Is yours a small company with just a few suppliers? The flexible I-Deal Mobile technology requires just a mobile phone, so it's perfect for use at your kiosk or food stand.

Easy to understand, inexpensive to use

You'll soon work out how to use I-Deal Mobile, even if you're not particularly up on how computers work. This system has been designed with ease of use in mind, and it's easy to understand. And what's more, starting to use I-Deal Mobile is inexpensive and straightforward. Installation is incredibly quick – you can start dealing with your orders instore in just a day or so.

Supplementing your existing business system

Extensive – and expensive – investments won't be needed. The flexible technology used for I-Deal Mobile can be integrated with all business systems. At VFM, we'll make sure that I-Deal Mobile can talk to your specific system.

We take overall responsibility and can customise your solution

I-Deal Trade offers very reliable and secure hosting. And your agreement will always include overall technical responsibility provided by VFM. We'll run your system, maintain it and handle its security. And because VFM develops flexible technical solutions, there's always the option of running pilot projects and supplying custom solutions. Give us a call and tell us what you need.

Streamline your ordering routines with I-Deal Mobile as early as next week! Welcome to VFM.
